

Weekend Labs

The background of the slide is composed of several large, overlapping triangles in various colors: red, orange, yellow, purple, blue, and teal. These triangles are arranged in a way that they point towards the center, creating a dynamic and modern aesthetic. The text is centered within the white space formed by these triangles.

What will we be covering?

- Web frontend project development fundamentals.
- Hypertext Markup Language(HTML5), Cascading Style Sheets(CSS3)
- JavaScript
- Additional factors affecting a web page; Quality testing tools

What is FRONTEND

"a front-end fee"
2. **COMPUTING**
relating to or denoting the part of a computer system or application with which the user interacts directly.

Translations, word origin and more definitions

FRONTEND VS BACKEND

FRONTEND VS BACKEND DEVELOPMENT

An illustration of an iceberg floating in the ocean. The tip of the iceberg, which is above the water line, is white and jagged, representing the 'Front End'. The much larger, submerged part of the iceberg is dark blue and represents the 'Back End'. Several seagulls are flying around the iceberg, and a few small figures of people are visible on the submerged part. The background is a bright blue sky with white clouds and a sun. The overall image is framed by a red and yellow geometric border on the left and top right, and a green and purple border on the bottom right.

Front End and Back End

Web Development Comparison:
What's the difference?

Broadly speaking, Backend development is:

Any kind of development that doesn't involve creating code that produces a user interface.
